STRUCTURES WALL SYSTEM

Hammary Structures  
301R Triple Multi Use Display

# STRUCTURES WALL SYSTEM - OVERVIEW

**HAMMARY STRUCTURES** collection offers a unique built-in look for creating a bookcase, entertainment wall, or other living room cabinetry. What sets the Structures Wall System apart is its ability to create a finished look, avoiding the uneven joints of multiple pieces while tailoring the wall system to each individual space. With a range of options from open shelving to glass door display and enclosed wood organization, Structures makes it possible to get a wall system that is the right size and offers the right function.

# HAMMARY®

STRUCTURES WALL SYSTEM

## BASE FRAME CONNECTION

Engineered base frames come in five different sizes to accommodate wall setups from 31 to 131 inches wide.

- 1 Base is put in place and leveled using built-in levelers.
- 2 A tall or short cabinet is then set onto the base using the cleat and channel for placement.
- 3 Pre-installed threaded inserts are used to securely attach the cabinet

## INTERLOCKING CABINETS

Each cabinet piece is designed to fit either directly onto the base frame or onto another cabinet.

Cabinets are available as single or double units.

Because both ends (top and bottom) of each cabinet include the same connectors and cleat/channel, single door units can be set up to open left or right.

Door style cabinets ship with both glass and wood door panels for easy customization.

## FINISHING CROWNS

Like the base, the finishing crown frame is designed to fit in place with the help of the interlocking cleat and channel guide.

Pre-installed threaded inserts are used to securely attach the crown to the cabinet top.
